Re: Customs & Border Protection Firing Range

Dear Whitney,

As you know this project was a very successful project for everyone involved. The project team completed the Firing Range project in Harpers Ferry, WV ahead of schedule despite major setbacks due to unforeseen site conditions.

I especially appreciate you & your field supervisor Ron Despain for always willing to do what ever it took to make your portion of the work complete, on time, and done right the first time. Ron Despain and my Superintendent Jim Grant worked so well together, that also was important to the success of this project.

Nabholz Construction and the Assistant Director of the facility was very pleased with the quality of your work and appreciative of the alternative finish that you suggested for the Firing Range slabs.

Your superiors should be proud of you and your team's contribution to this project. Special thanks to everyone at MK Concrete that was part of this successful project.

I look forward to working with you and MK Concrete in the future.

Sincerely,

Jared L. Brown
Senior Project Manager
Nabholz Construction
